Online Ordering System

Introducing Online Ordering System for your Restaurant. What about an online menu that sells on your website? Subscribe to our Online Ordering System and add few codes to your existing website. Turn your facebook likes into orders. Post mouth-watering photos with the latest recipes, and let your followers order right-on Facebook. Your page fans just love sharing food stuff with their friends.

Get it on Google play

Available on the App Store

Some Awesome Features

Order from Website

Subscribe to our Online Ordering System and add few codes to your existing website to pop Order Online button and you're done

Order from Facebook

Turn your facebook likes into orders. Post mouth-watering photos with the latest recipes, and let your followers order right-on Facebook.

Order receiving App

Receive instant push notifications on your smartphone or tablet every time your customers place an order. Confirm the order, print the order and more

How It Works?

1 Customer submit their order

Customer submits the order seeing the menu on your website, Facebook page or we can customize mobile application exclusively for your restaurant from which customers submit their orders

2 Receive orders in your smartphone / tablet

Turn your smartphone or tablet into an order receiving machine with our special App. Receive instant push notifications on your smartphone or tablet every time your customers place an order.

3 Confirm / Reject orders instantly

Once you have accepted the order, your customer instantly receives the confirmation and the personalized delivery time. No more calling back to confirm. Just start cooking. You may also reject orders if needed.

Demo on Facebook

Post mouth-watering photos with the latest recipes, and let your followers order right-on Facebook. Your page fans just love sharing food stuff with their

Demo on Website

Enhance your website's potential. It becomes easy to browse through and select from your delicious menu, making online ordering through your website.
